

Login Page (HTML form)

Sign Up → create entry in DB User table
load the Welcome page on
successful sign up.

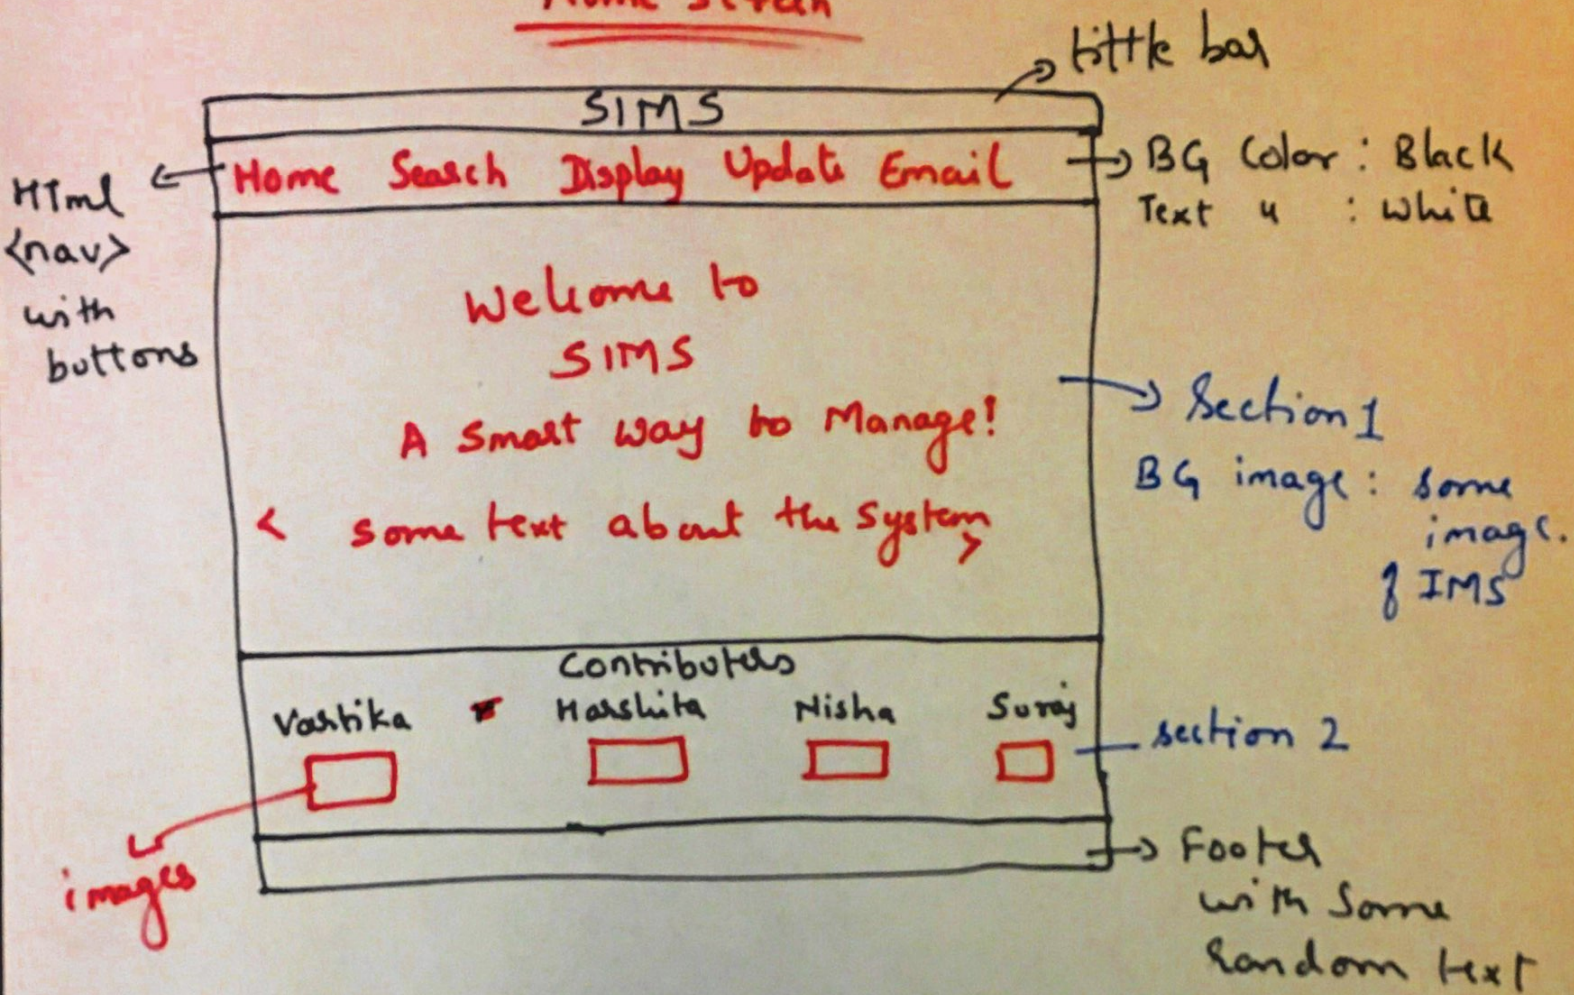

Error Message if email already
exists in User table.

Sign In → load Welcome Screen on
Success

Error Message for invalid
email or Password.

* Password should be masked.

Home Screen

On load of this jsp it should make a call to Utils class loadMap() method.

This method will create ^{static} DB Connection & save all the inventory from Database in a hash map.

Hash map is of the format

HashMap (ProductId, JavaBean of Product)
